

feenbo

Feenbo, con sede nella terraferma veneziana, è una moderna azienda specializzata nella produzione di apparecchi d'illuminazione.

L'affermazione di Le Corbusier "L'Architettura è il gioco sapiente, rigoroso e magnifico dei volumi sotto la luce" riassume la mission aziendale: sviluppare soluzioni ottimali per illuminare spazi e volumi soddisfacendo il comfort visivo e creando emozioni sia attraverso la giusta atmosfera luminosa che attraverso il design dell'oggetto illuminante.

Feenbo produce per l'architettura, l'interior design di ambienti abitativi e residenziali, per l'industria e per gli spazi urbani. La produzione viene effettuata rigorosamente in Italia, rivelando un forte radicamento nel territorio e nelle tradizioni del Made in Italy. La vocazione dell'azienda all'internazionalizzazione dei propri prodotti è supportata dalla capacità di soddisfare qualsiasi richiesta custom-made.

Grazie alla continua ricerca e all'impiego delle nuove tecnologie sono stati sviluppati apparecchi intelligenti, sostenibili e riciclabili, dalle elevate prestazioni illuminotecniche e con un alto contenuto estetico.

Feenbo, con il suo team di progettisti e designer, collabora con tutti quegli architetti, interior designer, paesaggisti, urbanisti, ingegneri, dei settori sia pubblico che privato, che cercano in un'azienda il partner ideale per sviluppare prodotti di eccellenza per scelta dei materiali, contenuto tecnologico e affidabilità dei servizi pre e post vendita.

Feenbo, with head office in the Venetian main land, is a modern company specialized in the production of lighting fixtures.

The affirmation of Le Corbusier "Architecture is the wise, rigorous and magnificent game of volumes under the light", resumes the company mission: to develop excellent solutions to light up spaces and volumes satisfying the visual comfort and creating emotions either through the right bright atmosphere and the lighting object design.

Feenbo produces for the architecture, the interior design of living and residential ambient, for the industry and urban spaces. The production is strictly Made in Italy, revealing a strong radication in the territory and Made in Italy traditions. The vocation of the company to the internationalization of our products is supported by the ability to satisfying any custom made request.

Thanks to the continuous research and employment of new technologies, we developed smart products, sustainable and recyclable, with elevated lighting performances and with a high esthetical content.

Feenbo, with his team of planners and designers, collaborates with all architects, interior designer, landscapists, urbanists, engineers, in private and public fields, that look for an ideal partner to develop items of excellence for materials, technological content and liability in pre and post-sale service.

NU CLEO

Spacetime collection

design_Buzzo•Lambertoni

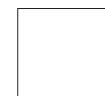

"La collezione Spacetime, in tondino metallico, vuole catturare la poesia cosmica dei tessuti spaziotemporali con l'ambizione di portarne un po' nelle nostre case: i bianchi tondini illuminati nell'oscurità ripercorrono così le stesse traiettorie delle rappresentazioni grafiche di affascinanti fenomeni fisici".

In Nucleo la sorgente luminosa diventa il nucleo ardente di un pianeta, che ruotando genera un campo le cui linee di forza escono da un polo ed entrano nel polo opposto. I raggi da cui è composta Nucleo hanno tutti la stessa curvatura e sono archi di quelle che potrebbero essere le sue linee di campo.

ceramic

metal

"the collection Spacetime, in metal bar, wants to catch the cosmic poetry of the space-time tissues with the ambition to bring some into our houses: the white bars illuminated in the darkness, ride the same trajectories of the graphic and fascinating physical phenomena".

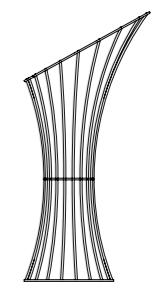

In Nucleo the light source becomes a burning nucleus of a planet , that rotating generates a field which lines of strength come out from a pole and go in the opposite pole. The rays which compose Nucleo have all the same curve and are arcs which could be its field lines.

RADIATIONS

Spacetime collection

design_Buzzo•Lambertoni

Radiations è frutto di una incredibile intuizione di Einstein: la curvatura dello spazio-tempo, causata da una massa, curva il raggio di luce, lasciandosi radere e raggirare da essa, ma senza trattenerlo. E la luce poi riprende serena il suo fulmineo cammino verso l'infinito.

Radiations is the fruit of an incredible intuition of Einstein: the bending of the space-time, caused by a mass, curves the light ray, letting it graze and swindle by it, but without keeping it.

And then the light restarts quiet its flashing way towards the infinity.

WORMHOLE

Spacetime collection

design_Buzzo•Lambertoni

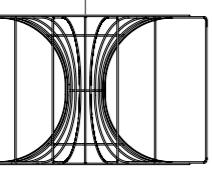

Una delle più affascinanti teorie dello spaziotempo è quella dei varchi spaziotemporali, attraverso i quali è possibile spostarsi da una dimensione all'altra. La sua forma ideale, oltre al suo fascino, ben si presta ad un suggestivo gioco di luci ed ombre, sia come lampada da terra che da soffitto.

According to the general relativity theory of Einstein, the space-time deforms around the planets and the stars causing the gravity. The lamp Star simulate the space-time tissue deformed around a star, represented by the light source.

GR ID

design_Simone Montanaro

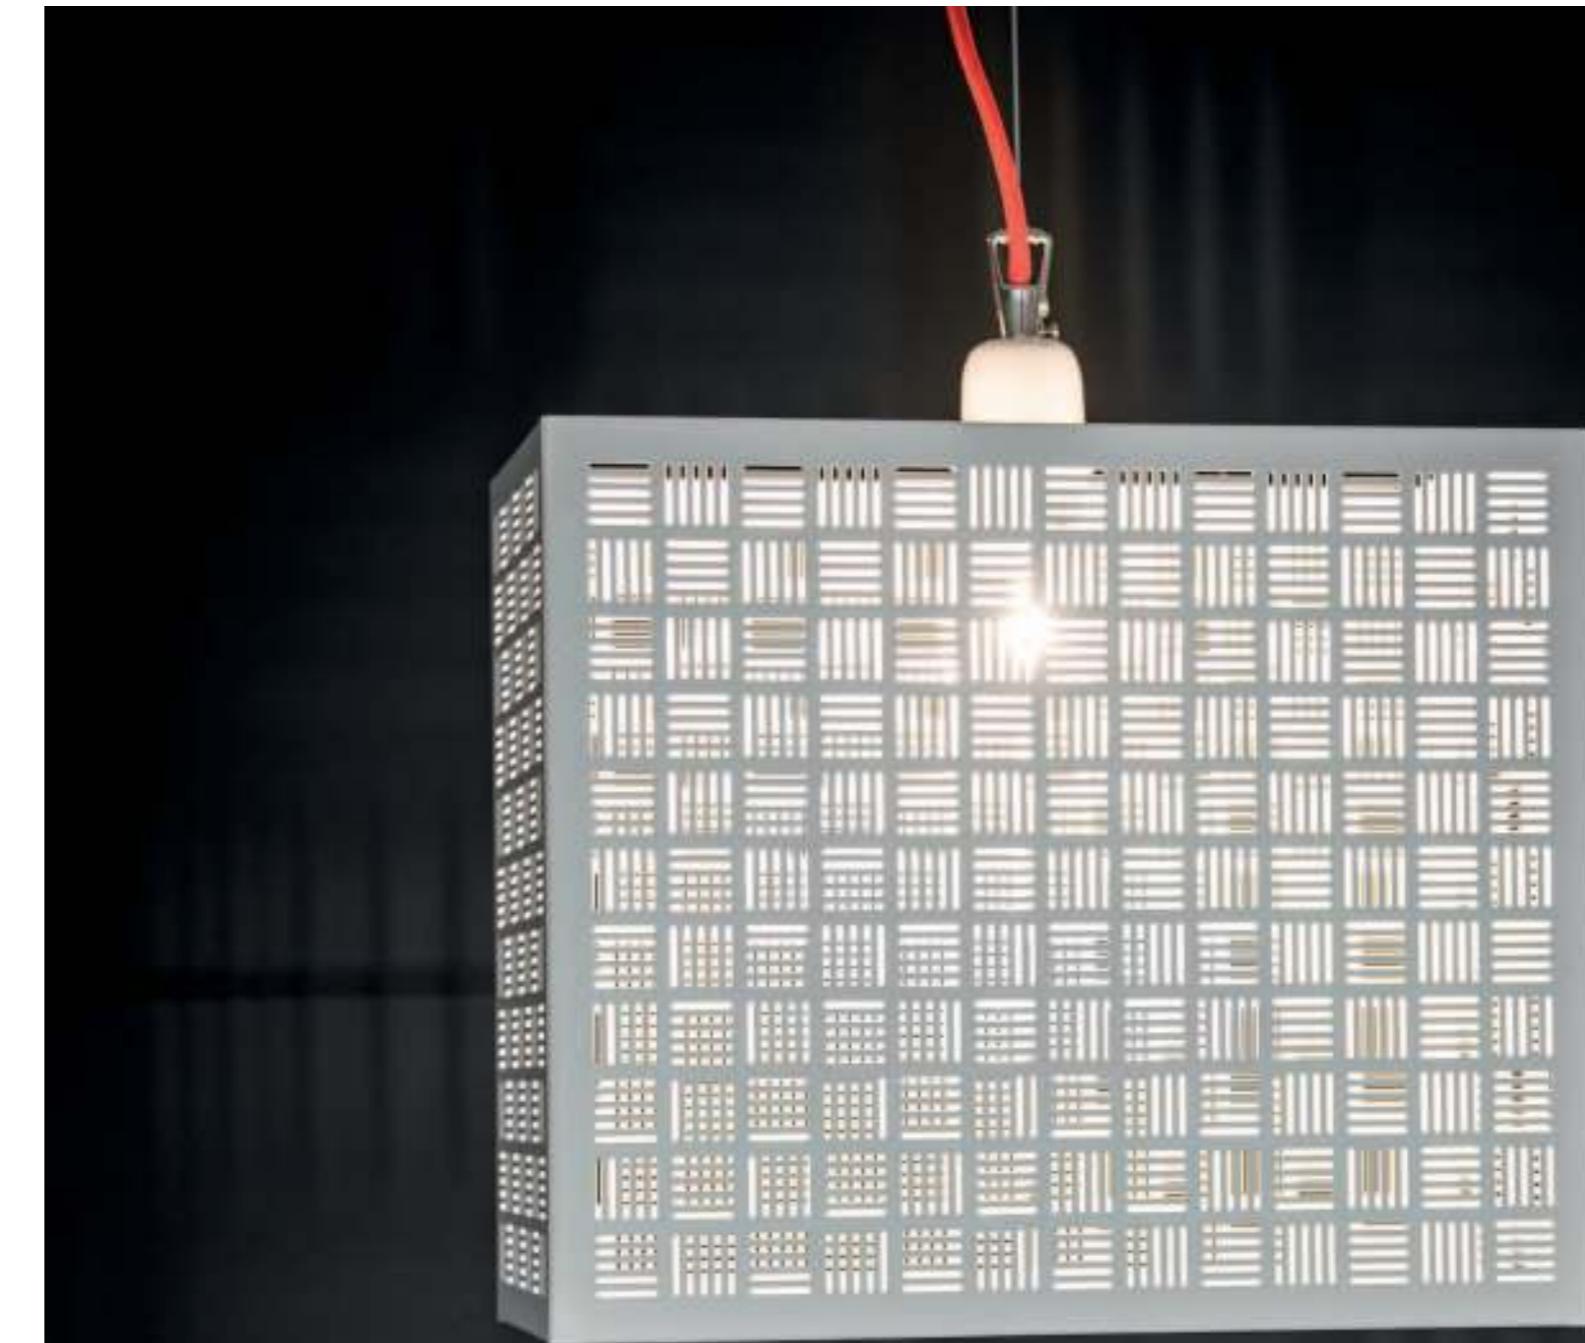

La luce si sprigiona e supera i limiti fisici della gabbia metallica in cui è contenuta. L'involucro diventa esso stesso fonte di luminosità grazie alle aperture sulla superficie che diventano elemento decorativo e funzionale. La luce è libera di "evadere" dal suo spazio per propagarsi nell'ambiente e corromperlo. Per contrasto, da una forma ben definita come un parallelepipedo, si diffondono invece una luce inaspettata, mutevole.

The light exhales and get over the limits of the metallic cage which contains it.

The shell becomes itself a source of brightness thanks to the surface holes that become functional and esthetical elements.

Light is free to "escape" from its space to travel through the ambient and corrupt it.

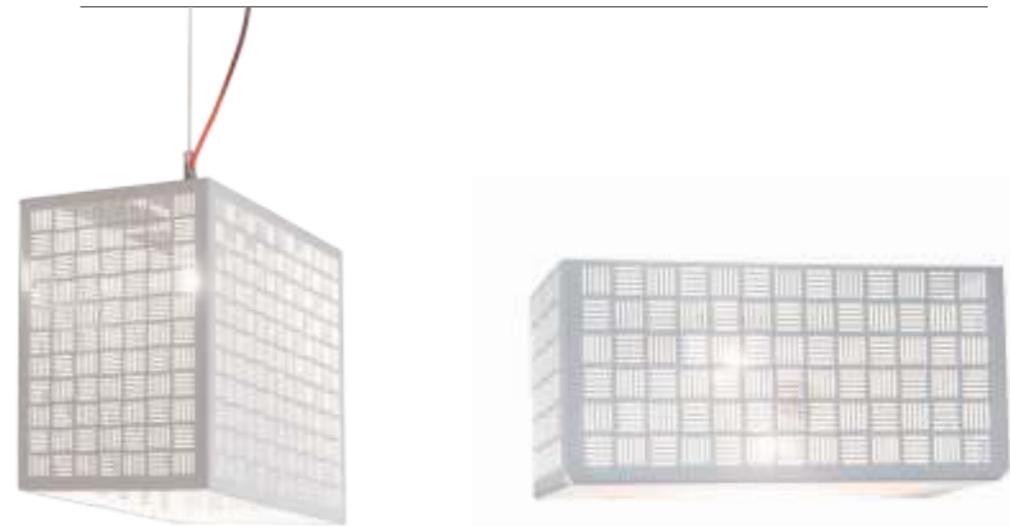

As contrast, from a well defined shape as a parallelepiped, it diffuses instead an unexpected and changeable light.

DESIGNERS

design_
Simone Montanaro

MontanaroDesign è uno studio di progettazione, ideato dal designer Simone Montanaro, laureato al Politecnico di Milano, che si occupa di design e architettura con sede a Milano.

Lo studio nasce con lo scopo di creare una realtà composta da professionisti con molteplici capacità per offrire alle aziende, operanti in diversi settori merceologici, un valido supporto sotto il profilo della progettazione industriale e del design in generale.

Grazie al suo team di collaboratori interni ed esterni, lo studio sviluppa proposte progettuali in grado di soddisfare le richieste delle aziende realizzando sia elaborati grafici che modelli dei progetti, offrendo ai clienti un valido supporto per valutare la validità delle proposte.

MontanaroDesign Studio is a design company from designer Simone Montanaro graduated from the Politecnico of Milano, who is responsible for design and architecture based in Milan.

The company was established with the aim of creating a reality composed of professionals with multiple skills to offer companies operating in different sectors, a valuable support in terms of industrial design and design in general.

Thanks to its team of internal and external collaborators , the study develops project proposals that will meet the demands of the companies that made both elaborate graphics models of the projects , providing customers with a valid support to assess the validity of the proposals.

design_

design_
Giovanni Barbato

Giovanni Barbato è nato a Padova nel 1974. Ha frequentato l'Università d'Architettura a Venezia e un corso di Industrial Design a Padova. Ma è la passione per il vetro che lo porta a studiare presso la scuola Abate Zanetti di Murano dove stringe amicizie e collaborazioni con le prime vetrerie, iniziando fin da giovanissimo a firmare progetti per numerose aziende dell'isola e diventando uno dei designer di spicco nel panorama dell'illuminazione. Nel 2012 collabora con le più importanti aziende del settore. Nel 2013 vince il Good Design Award.

Giovanni Barbato was born in Padua in 1974. He graduated from the University of Architecture in Venice and then attended a course in Industrial Design in Padua. It was the passion for glass that led him to study at the Abate Zanetti school di Murano where he established friendships and collaborations with the glass factories. At a very early age, he started to design and sign projects for many companies in Murano Island, becoming one of the leading designers in lighting. In 2012, he has been cooperating with some of the main companies in the lighting industry. Is a winner Good Design Award of 2013.

Buzzo•Lambertoni

Serena Lambertoni e Francesco Buzzo sono due designer che vivono e lavorano a Milano dove si laureano presso il politecnico nel 2012. Dal 2014, dopo collaborazioni con studi esterni e progetti personali, iniziano a progettare insieme. Vincono alcuni concorsi nazionali ed internazionali (tra cui Muji Design Award 04) e i loro lavori vengono esibiti in diverse occasioni e nazioni. Si occupano di design del prodotto, allestimenti e comunicazione.

Serena Lambertoni and Francesco Buzzo are two product designers who live and work in Milan, where they graduated in 2012 at Politecnico di Milano.

From 2014, after collaborating with several professionals and individual projects, they started their own design studio. They won some national and international design contest (such as the MUJI DESIGN AWARD 04) and their works are and has been exposed in different occasions, countries and fairs. Their activities include product design, communication and exhibition.

design_
Zucca

Professionista indipendente e consulente per diverse aziende del settore. La formazione nell'ambito dell'illuminazione inizia dall'esigenza di arredare diverse location per costruire forme nuove di illuminazione.

Professional and independent consultant for various companies. The formation under illumination starts from the need to furnish different locations to build new forms of lighting.

design_
Giancarlo Aldighieri

Laureato in architettura a Venezia, da molti anni operativo in Italia e all'estero, si occupa di architettura, residenziale e commerciale, architettura degli interni e design collaborando con varie aziende del settore. Segue lo studio e la progettazione di grandi impianti, bar e locali di intrattenimento studiandone il layout, il concept, fino ai minimi dettagli delle tavole e complementi d'arredo. Dal 1989 fonda il negozio di arredamento, luci e complementi d'arredo Il Ghibellin Fuggiasco di cui attualmente continua a seguire la scelta dei prodotti e l'immagine.

Graduated in Architecture at Venice, operating in Italy and abroad since many years, he devotes himself with residential and commercial Architecture and Interior design, collaborating with various enterprises of this field. He follows the study and design of big installations, bars and entertainment spaces making the layout and concept till the final interior furniture design.

In 1989 he founded the furniture, lighting and complements shop Il Ghibellin Fuggiasco for which he still takes care about product's choice and art direction.

design_
Andrea Lazzari

Nato a Venezia nel 1972. Dal 1996 terminati gli studi di progettazione e disegno industriale si occupa di progettazione di lampade per interni.

Nel 1999 inizia a collaborare con prestigiose aziende nel settore dell' illuminazione firmando le sue prime collezioni di successo. I/B lab

Dinamico duo di creativi italiani che iniziano una stretta collaborazione con FEENBO entrando a far parte dello staff interno di progettisti. Convincione nelle proprie idee ed incoscienza nel comunicarle danno un sapore positivo alle creazioni di ICIO+BROMBE, che portano all'Azienda dei prodotti essenziali ma di grande impatto.

Dynamic duo of creative Italians that started a tight collaboration with FEENBO joining the interior staff of designers. Conviction in their own ideas and unconsciousness in communicating, give a positive flavor to the creations of ICIO+BROMBE, which bring to the Factory essential products but with great impact.
